		AP Human	Geography	
			Time : 122h 47m / Lessons : 149 / Ac	tivities : 3
Unit	Торіс	Lesson	Lesson Objectives	Time
	Course Introduction		Introduction to AP Human Geography	7m
			Introduction to Unit 1	2m
		Thinking Geographically	1. Define geography and examine its various uses	27m
		5 5 7 5	2. Identify the roles of perception, perspective, and scale in geography	
		Geographic Concepts	1. Examine the Five Themes of Geography	33m
	Introduction to Human	deographic concepts	2. Identify the Six Essential Elements of Geography	
	Geography	Working with Maps and Data in Geography	Differentiate among the most commonly used map projections     J. Identify different types of maps, including climate, physical, and political, and     identify their purposes     J. Use coordinates of latitude and longitude to determine location	34m
			Reading Lesson: Key Issue 1.1–1.2	2h 17n
			Reading Lesson: Key Issue 1.3-1.4	3h 46n
			1. Explore the physical systems that shape Earth's surface	-
		Understanding Physical Geography	2. Identify landforms and bodies of water commonly found on Earth's surface	28m
Geography: Its Nature and Perspectives		_	<ol> <li>Compare the various climate zones and biomes found on Earth</li> <li>Identify the major physical characteristics, climate regions, and ecosystems of</li> </ol>	<u> </u>
and Perspectives		Physical Geography of Oceania and Antarctica	Linestigate the industries, natural resources, and ecosystems of Australia, New Zealand, Antarctica, and the Pacific Islands     Z. Investigate the industries, natural resources, and environmental challenges of Oceania	32m
	Geography of Oceania and Australia		3. Examine why the physical geography of Antarctica attracts scientific study	
			Examine important aspects of the cultures, governments, and economies of Australia, New Zealand, and the Pacific Islands     Z. Explore aspects of Aboriginal culture and examine the relationship between Aborigines and Australia's majority groups	-
		Cultural Geography of Oceania and Antarctica	3. Identify the challenges New Zealand has faced in integrating Maori and European cultures 4. Examine the effects of culture and resource distribution on trade in the Pacific	- 39m
			Island region	41.00
		주미엽	Map Assignment	1h 30n
	Unit Test	Unit Test	Explain methods used by geographers to source information and develop ideas.     Describe the skills geographers use to analyze and interpret spatial data and patterns.	 40m
			3. Explain central geographical concepts that inform a geographer's approach.	
	offic resc	onit rest	4. Identify major world regions.	
			<ol> <li>Describe the skills geographers use to analyze and interpret spatial data and patterns.</li> </ol>	
			6. Explain how the use of geospatial technologies helps geographers to acquire information and discover spatial patterns.	
			Introduction to Unit 2	2m
			1. Identify the major physical characteristics of Asia	
			2. Describe the natural events and disasters that affect Asia	24
		Physical Geography of Asia	3. Identify the major climate regions and ecosystems of Asia	- 34m
	Geography of Asia		4. Give examples of the industries, natural resources, and environmental challenges of Asia	
			1. Examine significant events and developments in Asian history.	
		Cultural Geography of Asia	2. Discover elements of cultures throughout Asia	37m
			3. Compare and contrast cultures in eastern and southern Asia	1
			Map Assignment	1h 30r
			1. Identify sources of data used by geographers	
			2. Understand methods geographers use to measure and represent population	1
		Population Distribution	density 3. Identify and describe the four stages of demographic transition	37m
			4. Interpret and compare demographic data and draw conclusions	+
			Interpret and compare demographic data and draw conclusions     I. Explore historical trends of population distribution	
		Population Distribution		35m
		Population Distribution	<ol> <li>Examine historical patterns of human migration</li> <li>Identify global population distribution and reasons why it is concentrated in some</li> </ol>	Josef
			areas and not in others	
			Reading Lesson: Key Issue 2.1-2.2 1. Define the terms fertility and mortality and understand their meanings in terms of	17m
	Analyzing Population Dat	Patterns of Fertility and Mortality	demographics 2. Understand the relevance of total fertility rate, mortality rate, and infant mortality rate	31m
			3. Analyze differences in the fertility and mortality rates of low-income versus high- income countries	
			1. Analyze factors contributing to modern health crises	_
		Health Care and Disease	2. Define the term endemic as it applies to disease	- 36m
			3. Identify common endemic diseases	5011

<b>-</b> 1.1			4. Examine the effects of HIV/AIDS on the population of Botswana	
Population			1. Identify economic, social, and environmental factors contributing to government population policies	20
		Politics, Policies, and Population	2. Analyze the Swedish government's motivation for promoting population growth	- 38m
			Reading Lesson: Key Issue 2.3-2.4	17m
			1. Differentiate between forms of human movement, including migration, cyclic movement, and periodic movement	
			2. Contrast forced and voluntary migrations	
		Movement: Migration	3. Evaluate reasons for voluntary and domestic migration	37m
			4. Examine reasons for historical forced migrations	-
	-		Reading Lesson: Key Issue 3.1-3.2	1h 46m
	-		1. Analyze trends in the international migration of refugees	
		Immigration: Refugees and Asylees	2. Explore examples of migration due to political, economic, social, or environmental	33m
	Immigration and Migration	iningration. Relagees and Asylees	reasons 3. Identify challenges facing refugees, their destination countries, and humanitarian	55111
			aid organizations	
			1. Identify recent patterns of human migration for economic purposes	-
		Economics of Migration	<ol> <li>Examine the impact of remittances on migrant workers' home nations</li> <li>Understand the impact of migrant workers on the economies of their country of</li> </ol>	38m
			employment	-
	-		4. Analyze the socioeconomic consequences of migration	
	-		Reading Lesson: Key Issue 3.3-3.4	3h 17m
			AP Skills: Writing a Free-Response Essay	36m
			1. Describe methods for analyzing a population's changing composition.	
			2. Describe the causes and effects of demographic transition.	
			3. Describe population trends and the theories that model and predict these trends.	
	Unit Test	Unit Test	4. Explain how a population's density and distribution can be measured.	40m
			5. Describe types of migrations and the factors that can cause them.	-
			6. Explain how changing populations and the natural environment can affect one	
			another. 7. Identify challenges and consequences of migration.	-
		Introduction to Unit 3	미국한교 유조스쿡	2m
			1. Describe the major physical characteristics, climate regions, and ecosystems of the	2
	Geography of Southwest Asia	Physical Geography of the Middle East	Middle East	32m
			<ol> <li>Identify the natural events and disasters that occur in the Middle East</li> <li>Give examples of the industries, natural resources, and environmental challenges</li> </ol>	32111
			in the Middle East	
		Cultural Geography of the Middle East	1. Identify significant events and developments in Middle Eastern history	4
			2. Examine the role of religion in government and society in the Middle East     3. Analyze the Israeli-Palestinian conflict and explain how it influences political	38m
	-		relations in the Middle East and around the world	
			Map Assignment	1h 30h
			1. Identify the main components of culture	-
		Exploring Culture: Concepts of Culture	2. Differentiate between types of cultures, including popular culture, subculture, and local culture	37m
			3. Examine the relationship between the environment and culture	
	Folk and Popular Culture		1. Explore the effects of environment on culture	
	roikana ropaiar caltare	The Environment: Shaping Cultures	<ol><li>Identify environmental factors that contribute to settlement patterns, the establishment of settlements, and the formation of culture</li></ol>	38m
			<ol> <li>Examine the effects of environmental diseases on specific cultures, and identify efforts to eradicate or control these diseases</li> </ol>	
	-		Reading Lesson: Key Issue 4.1-4.2	1h 46m
			Reading Lesson: Key Issue 4.3-4.4	1h 48m
			1. Identify the world's language families and examine how a language family evolves	
Cultural Patterns and Processes (Culture and		Exploring Culture: Language	2. Examine the diffusion of languages	38m
Language)	Language		3. Understand how language contributes to a region's cultural identity	-
	-	Reading Lesson: Key Issue 5.1-5.4	Reading Lesson: Key Issue 5.1-5.4	31m
		redding 2000 neg 1000 0.1 0.1	1. Identify the five major world religions	•
		Exploring Culture: World Religions		32m
		Exploring Culture. World Keilgions	2. Compare and contrast the beliefs of Judaism, Christianity, and Islam	52111
	-		3. Compare and contrast the beliefs of Buddhism and Hinduism	
			1. Explore the spread and diffusion of the major world religions	
	Religion	Exploring Culture: Diffusion of Religion	2. Examine the ways cultures have appropriated, diffused, and changed religions	36m
			3. Identify cultural conflicts based on religious differences	
			Reading Lesson: Key Issue 6.1-6.2	1h 31m
			Reading Lesson: Key Issue 6.3-6.4	3h 1m
			Mini-Lesson: Cultural Landscape Project	1h 31m
			Essay Assignment	31m

			1. Explain the connections between culture, landscapes, place, and identity.	-
			2. Describe different cultural approaches to places and the environment.	
	Unit Test	Unit Test	3. Describe cultural traits.	40m
			4. Explain ways that culture can change and spread.	
			5. Analyze cultural traits and characteristics of human societies.	
			Introduction to Unit 4	2m
			1. Describe the major physical characteristics, climate regions, and ecosystems of	
		Physical Geography of Africa	Africa 2. Identify the natural events and disasters that occur in Africa	32m
ſ			3. Give examples of the industries, natural resources, and environmental challenges	-
	Community of Africa		in Africa 1. Identify aspects of African cultures and ways European and Asian cultures have	
ſ	Geography of Africa		become infused	1
ſ		Cultural Geography of Africa	2. Explore the importance of Islam to the peoples of North Africa	- 34m
			3. Analyze the importance of the arts to the cultures of Central and West Africa	
			4. Examine major culture groups of East and Southern Africa and discover important aspects of their cultures	
ſ			Map Assignment	1h 30m
			1. Understand the concept of identity and how identities are constructed	
ſ		Exploring Culture: Race, Ethnicity, and Gender	2. Differentiate between race and ethnicity and explore their roles in defining identity	36m
ſ			3. Differentiate between gender-based systems of lineage and leadership in societies	1
	Ethnicity	Reading Lesson: Key Issue 7.1-7.2		16m
ſ			1. Identify factors contributing to government involvement in population policies and	
ſ		Controlling Population: Eugenics and Genocide	changes 2. Understand the theory of eugenics and the act of genocide as they relate to Nazi	32m
ſ			Germany before and during WWII and Rwanda in 1994	
			Reading Lesson: Key Issue 7.3-7.4 1. Examine concepts in political geography and identify ways space is organized into	1h 46m
ſ			states	-
		Territory and Boundaries in Geography	2. Compare and contrast nations and states as political constructs	32m
			3. Examine how boundaries are created through physical geography, geometry, and conflict	
			1. Examine how boundaries influence the distribution of goods and services, the ways issues are confronted, and who is represented	
	Boundaries	Geographer's Perspective: The Influence of Boundaries on Culture	2. Explore the ways that boundaries influence identity, interaction, and exchange	31m
I			3. Identify issues created by territoriality and boundaries, both natural and artificial	
		Geographer's Perspective: Types of Government and Political Systems	1. Differentiate among the types of states, including unitary and federal systems	1
ſ			2. Identify and describe key forms of government	32m
		Geography and Internal Boundaries	1. Understand the types of internal boundaries including city, county, state, and	
			federal 2. Differentiate between enclaves, exclaves, and territories as internal units	- 34m
			, ,	
ſ			Mini-Lesson: Geopolitical Theories	20m
			Reading Lesson: Key Issue 8.1	17m
1			1. Identify periods of expansion throughout history	
				-
		Changing Geography: Colonialism	2. Differentiate between direct and indirect rule	32m
		Changing Geography: Colonialism	<ol> <li>2. Differentiate between direct and indirect rule</li> <li>3. Differentiate among a territory, a colony, a commonwealth, and a dependency</li> </ol>	32m
		Changing Geography: Colonialism		32m
Political Organization of Space			<ol> <li>Differentiate among a territory, a colony, a commonwealth, and a dependency</li> <li>Compare and contrast European colonialism in Africa, Asia, and the Americas</li> <li>Compare and contrast the colonial systems of Spain, England, and France in the</li> </ol>	
Political Organization of Space		Changing Geography: Colonialism Colonialism in Africa, Asia, and the Americas	3. Differentiate among a territory, a colony, a commonwealth, and a dependency     1. Compare and contrast European colonialism in Africa, Asia, and the Americas     2. Compare and contrast the colonial systems of Spain, England, and France in the     New World     3. Analyze the effects of the scramble for Africa on the people and economies of the	32m 38m

	Modern Political	Terrorism: The Global Threat	2. Analyze factors that contribute to the growth of terrorist organizations	- 33m
	Challenges		3. Examine the effects of terrorism on the United States	-
			4. Identify the role of counterterrorist organizations	
			<ol> <li>Identify environmental challenges and possible solutions</li> <li>Examine the impact of globalization on world economies and the rise of regional</li> </ol>	-
		Modern Global Concerns	economic blocs 3. Analyze the reasons nuclear proliferation is a major global issue affecting	35m
			relationships between countries	
			Reading Lesson: Key Issue 8.4	3h 1m
			Essay Assignment	31m
			<ol> <li>Describe how ethnicity affects migration and settlement patterns.</li> <li>Explain the relationships between political structures and cultures, economies, and natural environments.</li> </ol>	-
			3. Analyze the historical evolution of modern geopolitical patterns.	
	Unit Test	Unit Test	4. Describe factors and challenges affecting modern geopolitics.	40m
			5. Describe forms of governance and political organization.	-
				-
			6. Describe the nature and functions of boundaries and territoriality.	-
			7. Explain the causes and consequences of ethnic conflict.	
			1. Identify major world regions.	-
			2. Describe types of migrations and the factors that can cause them.	-
			3. Explain ways that culture can change and spread.	
			4. Explain the connections between culture, landscapes, place, and identity.	
			5. Describe methods for analyzing a population's changing composition.	1
			6. Identify challenges and consequences of migration.	1
			7. Analyze cultural traits and characteristics of human societies.	1
			8. Explain how changing populations and the natural environment can affect one another.	-
			9. Describe the causes and effects of demographic transition.	
	_		10. Describe population trends and the theories that model and predict these trends.	
		우리집	11. Analyze the historical evolution of modern geopolitical patterns.	16 15-
Cumulative Exam	Cumulative Exam		12. Explain the causes and consequences of ethnic conflict.	1h 15m
			13. Explain the relationships between political structures and cultures, economies,	
			and natural environments. 14. Describe factors and challenges affecting modern geopolitics.	
			15. Describe how ethnicity affects migration and settlement patterns.	
			16. Describe different cultural approaches to places and the environment.	
			17. Describe forms of governance and political organization.	-
			18. Describe the nature and functions of boundaries and territoriality.	
			19. Explain central geographical concepts that inform a geographer's approach.	
			20. Describe the nature of the study of geography.	-
			21. Describe the skills geographers use to analyze and interpret spatial data and patterns.	
			22. Explain how the use of geospatial technologies helps geographers to acquire information and discover spatial patterns.	
			Introduction to Unit 5	2m
			1. Identify the major physical characteristics, climate regions, and ecosystems of the United States and Canada	
	Geography of North	Physical Geography of the US and Canada	2. Describe the types of natural events and natural disasters that affect the United States and Canada     3. Explain how natural resources are used to create industries in the United States and the environmental challenges they create     4. Analyze similarities and differences among different locations in the United States	- 36m
l	America		and Canada 1. Analyze the old world influences of Europe on modern identities in the US and	
			Canada.	
		Cultural Geography of the US and Canada	2. Examine American culture and identify regional cultural differences.	39m
